Adil Industrials is offering insulation solutions to its customers with a total quality and service focus. Since its establishment in 1978, Adil Industrials has set fulfilling its customers' needs as the primary goal and accordingly broadened its product range continuously through R&D and machinery investments.

Product development has always been our main strength as a result of R&D focus. With its commitment to total quality and customer-focused mentality Adil Industrials has become one of the leading solution partners in Turkey for plastic and rubber insulation materials.

Abbreviations Used In This Catalogue

BL Available as block	FR Available with fire retardancy
SH Available as sheet	AS Available as antistatic
RL Available as roll	UV Available with ultraviolet resistance
SC Special cutting available	CD Available with conductivity
DS Available as double sided tape	AB Available as antibacterial
OS Available as one sided tape	CT Available in different colors

Rubber Profile

adil extrusion is offering customer specific solutions using special mold designs at required densities of various raw materials.

Rubber Foam Profile

Rubber foam profiles which are used as vibration isolator and sealing gasket have low density, high elasticity, and high ozone resistance. Depending on customers' needs, can be produced as hose or profile form with or without adhesive.

Some of the areas of use are panel cover gasket, automotive door band, tank cover gasket and cabin gasket.

Rubber Profile

Rubber profiles which are used as vibration isolator and sealing gasket have high density, high elasticity, hardness, high ozone resistance and high shock resistance.

Some of the areas of use are special panel cover gasket, automotive gasket, tank cover gasket, filter gasket, cabin gasket and product carrying rubber in industrial plants.

adiroll develops special solutions to your needs. Using various raw materials, we are able to produce foam and rubber rolls at required thickness, density, elasticity and hardness depending on the applications our products are used.

adiroll product line can be produced either with one-sided or double-sided self adhesive. We leave the choice of adhesive and liner to our customers. We are able to produce using classic yellow havana liner or film liner which reduces labor hours remarkably due to its better application performance.

Polyethylene

Has closed cell form.
Has durability and low elasticity.
Suitable for heat and sound insulation.

Neoprene

Has closed cell form.
Has durability and low elasticity.
Has dynamic structure.

EVA

Has closed cell form.
Resistant against shocks.
Suitable for heat and sound insulation.

EPDM

Has closed cell form.
Resistant against ozone.
Suitable for working under wide range of heat levels.

Silicone

Has closed cell form.
High resistance to heat.
Dynamic structure.

Solid Rubber

Has closed cell form.
High resistance to shocks.
High density and elasticity.

adiroll foam and solid rubber rolls can be produced in following specifications:

- Thickness: 1mm -30mm
- Width: Up to 1500mm
- In requested colors
- One-sided self-adhesive
- Double-sided self-adhesive
- Without adhesive
- Special film supported

Adil Industrials has a solid experience in all gaskets used in industrial applications of all manufacturing sectors.

With **adilgasket**, we invite you to make use of this experience. In our die-cut and kiss-cut production lines any gasket needs are able to be met based on your needs.

adiltape offers the products you need for sound insulation, heat insulation, and vibration isolation according to requested technical specifications, thickness. Can be produced with or without adhesive.

adiltape foam and solid rubber rolls can be produced in following specifications:

- Thickness: 1mm - 30mm
- Width: 4mm - 1500mm
- In requested colors
- One-sided self-adhesive
- Double-sided self-adhesive
- Without adhesive
- Special film supported

Some of the areas **adiltape** bands used are;

- Ventilation channel insulation
- Roof insulation
- Wall insulation
- Level determinant
- Air conditioner interior component insulation
- Refrigerated vehicle insulation
- Cold room insulation
